

WORKSHOP II - REGISTRATION

This workshop is for you if you have been reading Tarot Cards for yourself or for others but have a desire to delve much deeper.

Leandra will share her skills and knowledge to guide you, enhancing your work and connection to the ancient craft of Tarot Card Reading, taking it to a whole new level. Learn the alchemical transformations that are possible through a holographic reading. Receive the tools and processes to be able to see the cards and read their energies multidimensionally, as well as through the ancient craft using symbols, images and colours. As you traverse time and space, the cards become a quantum field where you see, feel and hear what is true and right to know and bring through.

Workshop participants are asked to bring with them the Tarot Card deck they prefer to work with (please note you need to be comfortable with other people handling this deck in the course of the weekend) and ideally a second deck you are not familiar with; a journal and pen or pencils; your water bottle and some lunch (although there are plenty of cafes in Bangalow where you can find something yummy to nourish you at lunchtime), afternoon tea will be provided; and an open and peaceful heart.

Please provide the information requested below so that Leandra has a better insight into your experience with Tarot Cards and can prepare the workshop according to the varying learning desires from all participants.
